<b>SPEAKER</b>	Dr. Bruce Hobson & Dr. Bill Clifford
<b>TOPIC</b>	The use of data to assist in proactive care of populations at risk - Diabetes
<b>DATE/TIME</b>	Sept 22 <sup>nd</sup> 12:00-1:00 pm <u>OR</u> Sept 23 <sup>rd</sup> 8:00-9:00 am
<b>LOCATION</b>	Virtual meeting, link to be sent - RSVP <a href="mailto:info@hdcbc.ca">info@hdcbc.ca</a>

1 MAINPRO+  
GROUP LEARNING  
CREDIT

This is the first in a series of interactive accredited webinars being offered by the HDC. These programs are designed to help increase understanding of the practical clinical use of the HDC Discover application. Each one of these webinars will focus on a different disease area or clinical problem, and can also serve as a 'primer' for participation in PSP practice improvement activities.

## LEARNING OBJECTIVES

1. To understand how to utilize HDC Discover in a clinical case-based quality improvement project within your practice.
2. Be able to interpret your own practice patterns, for instance in diabetes, and relate to your peers and provincial trends.
3. Be able to undertake QI projects either with PSP (supported by a PSP coach or peer mentor), or independently using a tool such as HDC Discover.

The Health Data Coalition (HDC) is a physician-led data sharing initiative that encourages reflection and collaboration with colleagues and facilitates quality improvement in patient care.

**Better Information.**  
**Better Care.**  
**Better Patient Outcomes.**
