

HDC Discover 2.05 Release Notes

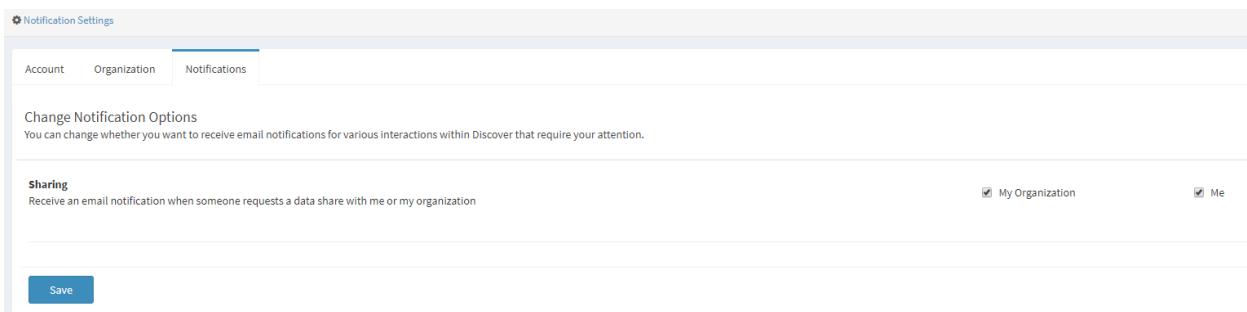

These release notes contain supplemental information about Version 2.05 of HDC Discover. Please don't hesitate to contact our support email support@hdcbc.ca should you have any questions or comments about any of these changes.

What's new?

This release includes a new feature to allow users to control email notifications of data sharing requests they receive from other HDC Discover users.

Previously, HDC Discover users needed to login to HDC Discover to see if they had received sharing requests. Now users can receive an email notification when another HDC Discover user requests to share data with them.

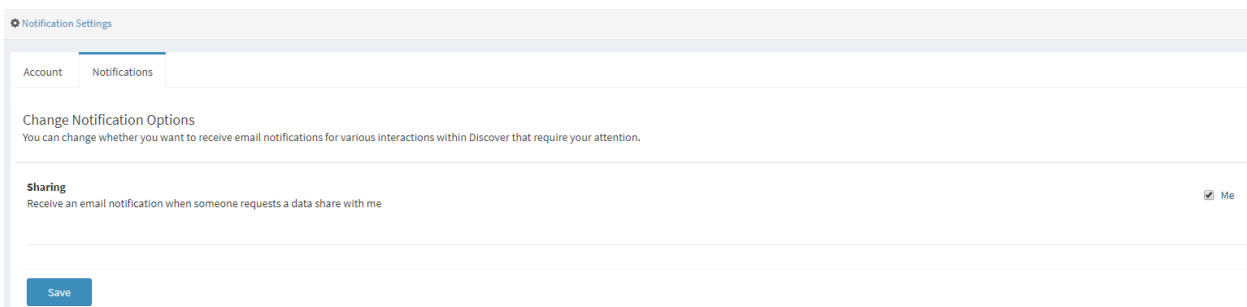

Users with an 'Administrator' role for their organization can control email notifications for their organization as well as for their own account, as shown in Figure 1 below:

The screenshot shows the 'Notification Settings' page for a user with the 'Administrator' role. The page has three tabs: 'Account', 'Organization', and 'Notifications', with 'Notifications' selected. Below the tabs, there is a heading 'Change Notification Options' and a sub-heading 'You can change whether you want to receive email notifications for various interactions within Discover that require your attention.' Underneath, there is a section titled 'Sharing' with the description 'Receive an email notification when someone requests a data share with me or my organization'. To the right of this description, there are two checkboxes: 'My Organization' and 'Me', both of which are checked. At the bottom left of the form, there is a blue 'Save' button.

Users with a 'Member' role for their organization can control email notifications for their own account, as shown in Figure 2 below:

The screenshot shows the 'Notification Settings' page for a user with the 'Member' role. The page has two tabs: 'Account' and 'Notifications', with 'Notifications' selected. Below the tabs, there is a heading 'Change Notification Options' and a sub-heading 'You can change whether you want to receive email notifications for various interactions within Discover that require your attention.' Underneath, there is a section titled 'Sharing' with the description 'Receive an email notification when someone requests a data share with me'. To the right of this description, there is one checked checkbox: 'Me'. At the bottom left of the form, there is a blue 'Save' button.

Better Information. Better Care. Better Patient Outcomes.

Resolved Issues/Bugs

A reported bug was resolved to fix an inconsistent colour legend on indicator charts. Previously, when switching between the EMR tab view and the All Indicators tab view for a clinic, the clinic colour on an indicator chart would change. This has now been fixed.
